Stream API plug-in for WordPress

Plug-in Installation

Please visit <u>http://www.idioma.com/en-GB/services/stream-translation-api/downloads/</u> to get the free plug-in zip file.

About idioma Services Partners Contacts	¥ f g⁺ in
Downloads Home / Services / Stream Translation API / Downloads	
Free CMS plug-ins Currently, free plug-ins are available for WordPress and Drupal. You are welcome to install, test, use and if needed modify these plug-ins. Both plug-ins can be set to work in our test environment (Sandbox) or to real production mode.	First steps towards Stream Translation API development 1) Create sandbox account 2) Generate API keys
As a developer, you are of course welcome to develop your own solutions, either by modifying the plug-ins we offer or by creating your own based on the Stream API interface.	3) Get testing client account
idioma free plug-in for WordPress (download) WordPress admin and user guide (download)	4) Use the Dummy translation server 5) Get and use API demo application 6) Usestade candher to partner account
 idioma free plugin for Drupal (download) Drupal admin and user guide (download) 	7) Release to the end client
Development tools This application is a step-by-step interactive guide that explains the full lifecycle of a typical translation request for web page	API details The Life cycle of the translation requests

You will need to create new client for testing in sandbox mode as well as new real client in production mode later. Please visit <u>http://www.idioma.com/en-GB/partners/for-developers/</u> to create your own sandbox account. You will receive the client's credentials to provided email.

If you want to use the plug-in in production mode and order real translations for your web, you will need the free upgrade to full status first. In this step you will acquire partner status with idioma and access to idioma portal as new agent for your own client(s).

How to develop with idioma	f ያ⁺ in
Create Sandhox account and obtain: Get our Day Tools	
Get our Dev roois Oberaue to rui status and do tive:	GO LIVEI
API access with an API Key and an API Secret. Including a demo download, detailed descriptions of all An idioma test account, so you can develop calls from API calls and responses, and the "localization lifecycle" that Got Live account access and an additional set of Live API your system to your idioma account to query the system shows you in which order calls must be made. Keys for each unique client your system supports.	us il set of Live API ;upports.
 Access to our Dummy Translation Server that accepts text Once you have developed your own "lifecycle" and you are from your system, and returns dummy translations (same text with initial letters in each word replaced). final step. 	ıg published in Iges.
CREATE YOUR SANDBOX ACCOUNT NOW GET DEV TOOLS AND DOCUMENTATION UPGRADE TO FULL STATUS AND GO LIVE!	GO LIVE!

You need to create real client(s) on the idioma portal. Please visit <u>http://tc.idioma.com</u> and login with your credentials, which you entered in the upgrade process. You will enter your partner account, where you can add new client(s). Use the same credentials of your client as you enter here for authorization of the plug-in in the production mode.

WordPress administration

There is a new item "Stream API" in the WordPress administration menu after plug-in installation.

There is a submenu with "Carts" management and "Settings" where you set up the plug-in and manage the authorization with idioma servers.

The Stream API may be set to Sandbox mode. You can test the functionality, while there is no real translation provided. This mode is free of charge.

To upgrade the sandbox account to production version please select the option in the Stream API settings under "Authorization" tab. If you want to change mode, you have to delete all not-ordered carts and/or wait until all translations are finished first.
